MONOBLOC VERTICAL STERILIZERS DLV CAB

 DLV CAB

● Vertical autoclaves **DLV CAB series**, featuring a simple construction and provided with built-in **steam generator**, meet the widest requirements of laboratories, research institutes and, as pilot or production equipment, in small lots, even of the Pharmaceutical Industries

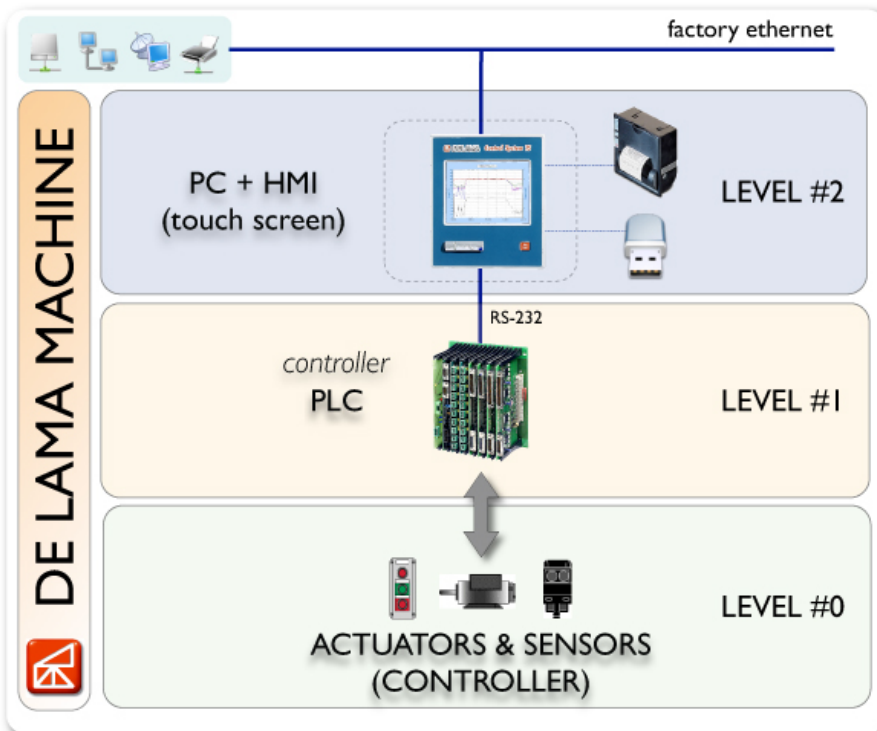

● The **simple design** and the **ease of use** find in DLV CAB autoclaves the ideal ratio between **quality** and **reliability**, and make them the ideal product for the widest requirements with an excellent "value for money"

- Execution in **AISI 316L** stainless steel
- Built-in **electrical steam generator**
- Built-in liquid ring **vacuum pump**
- **Cylindrical wire baskets** for loading/unloading
- Design, manufacturing and test according to **European Pressure Equipment Directive (P.E.D.) No.97/23/EC**
- Electrical system according to **CEI EN 60204-1:2006-09**
- Control and management system, **OLIMPYA/WP-TS** model, with SCADA architecture

 Loading Baskets

Control System

Control and management system, **OLIMPIA/WP-TS** model, featuring real SCADA structure (Industrial **PC + PLC with CPU**) is provided with:

- **Windows XP Embedded® operating System;**
- **Touchscreen**
- Creation of files for cycles tracking in **".pdf" format** directly downloadable on external memory via **USB** or printable locally on a **thermic printer**

AVAILABLE CONFIGURATIONS

DLV CAB model, having dimensions mm.dia.500x800(h) and 170-lit capacity, is available in the following configurations:

- **STERILIZATION by SATURATED STEAM** with max working parameters 138,2°C and 3,5 abs bar for solids, liquid solutions and porous materials
- **STERILIZATION by AIR/STEAM MIXTURE** with max working parameters 138°C and 5 abs bar for liquid solutions in sensitive packaging
- **STERILIZATION of HIGH PATHOGENIC RISK MATERIAL** and biological agents group 3 or 4 of the European Directive 2000/54/EC with max working parameters 138°C and 5 abs bar
